Manufacturing Plant of James Davidson's Sons, Ottawa, Ont., Canada

The late JAMES DAVIDSON, founder of business in 1874.

GRANT P. DAVIDSON

LIEUT. KEITH DAVIDSON R. A. F.

From Tree to Finished Product

James Davidson's Sons' Mill at Davidson, Quebec.

We Cut the Logs and Saw the Lumber

Our Doors, Sash, Blinds, etc., are manufactured from the product of our own Logs, which enables us to meet the requirements of the trade at bottom prices.

JAMES DAVIDSON'S SONS

OTTAWA, ONTARIO, CANADA

To the Trade

A LL prices quoted are F.O.B. Ottawa, Ontario, unless otherwise stipulated.

Terms net 30 days. Any extension or renewal will be subject to bank interest and exchange.

When goods are quoted delivered, the shipper allows actual freight only to delivery point agreed upon; but does not guarantee the safe delivery of goods, his responsibility ceasing when same are delivered to the Railway or Transportation Company in good order.

If a shipment is received in a damaged condition, make notation on freight receipt, write for original Bill of Lading and certified copy of invoice, so that you can make immediate claim on the carrying company for full value of damage incurred.

Small lots of doors should be ordered crated. They will reach you in better condition. An order of ten doors or less will be crated unless otherwise instructed.

All quotations are subject to change without notice.

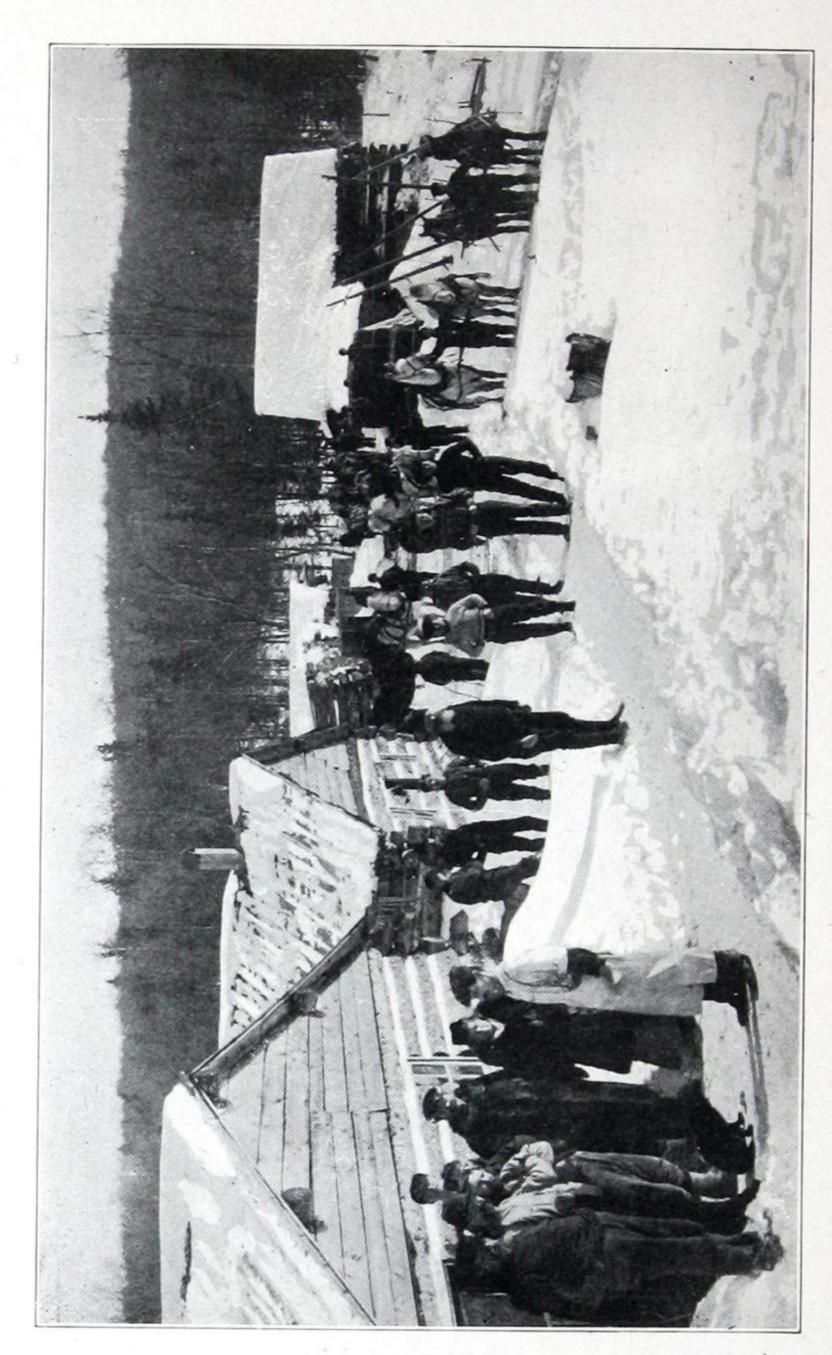

All agreements are contingent on strikes, accidents or other delays unavoidable or beyond our control.

Cancellations or alterations on any order will be accepted if same has not been put under way in the factory. If, however, order is partially manufactured it must be completed and accepted by customer as orginally ordered.

Description of DOWEL DOORS

In regard to Dowel Doors. By actual test it is the strongest door made. It seems to combine all the qualities of strength so well distributed that it can stand almost any kind of hard usage. It is put together with Hardwood Dowels, ⁵/₈" diameter and ⁵¹/₂" long. The holes for these dowels are actually filled with glue. Both dowels and holes being made by machinery, are all true to size, and there is no chance for an undue strain, as in the tenoned and wedged door, caused by the wedges being driven too hard, which is quite frequently the case, resulting in a split opening up in the rail, especially the top rail. The glue is spread more evenly on the dowel door, and no air whatever can reach it, while in the tenon door the wedges being driven from the outside of the stile and not being true to size, or driven accurately are liable to leave a certain amount of air space.

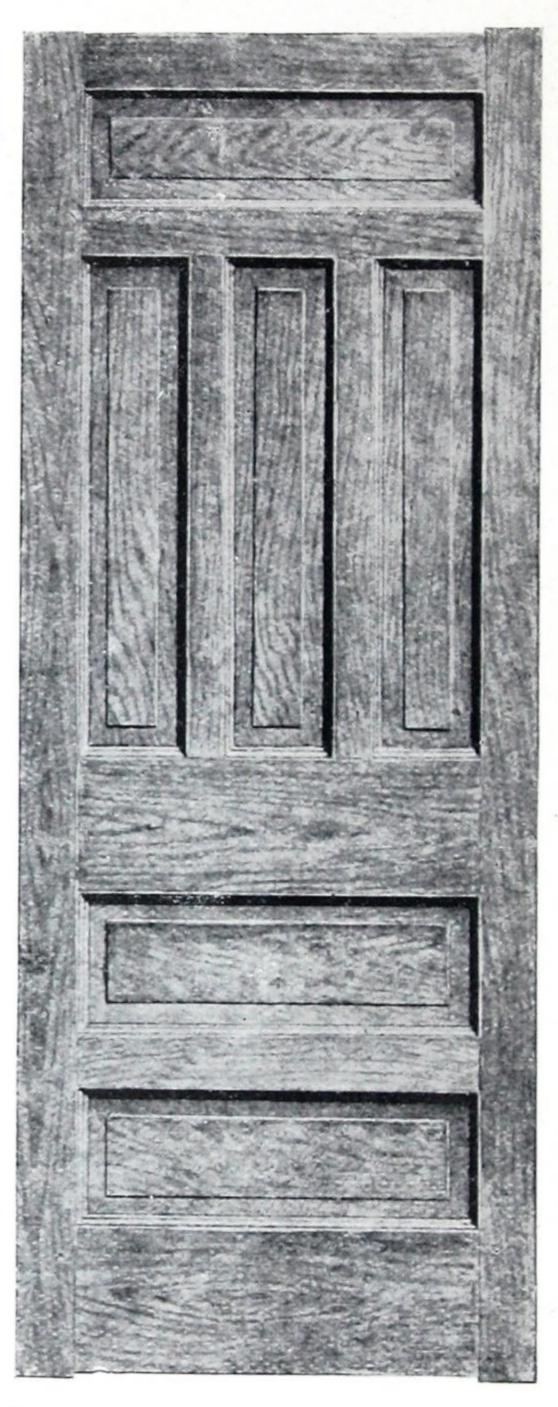

The old style tenon door is fast becoming a thing of the past. Progressive manufacturers are throwing out the machinery for the manufacture of the same and installing the necessary machinery for the manufacture of dowel doors. We have no hesitancy whatever in giving absolute guarantee of the strength and durability of our dowel doors. These doors are cramped together by machinery that insures having tight joints, much closer joints than it is possible to have by the ordinary cramps used for tenon doors.

In appearance they look much better, as they have no ugly looking tenons showing through the stiles.

width or height, and deduct regular discount.

Doors veneered different wood each side, add 30 per cent to

Veneered Doors

We guarantee both quality and manufacture, but they must have proper care. Give them one or two coats of good oil stain or filler as soon as received.

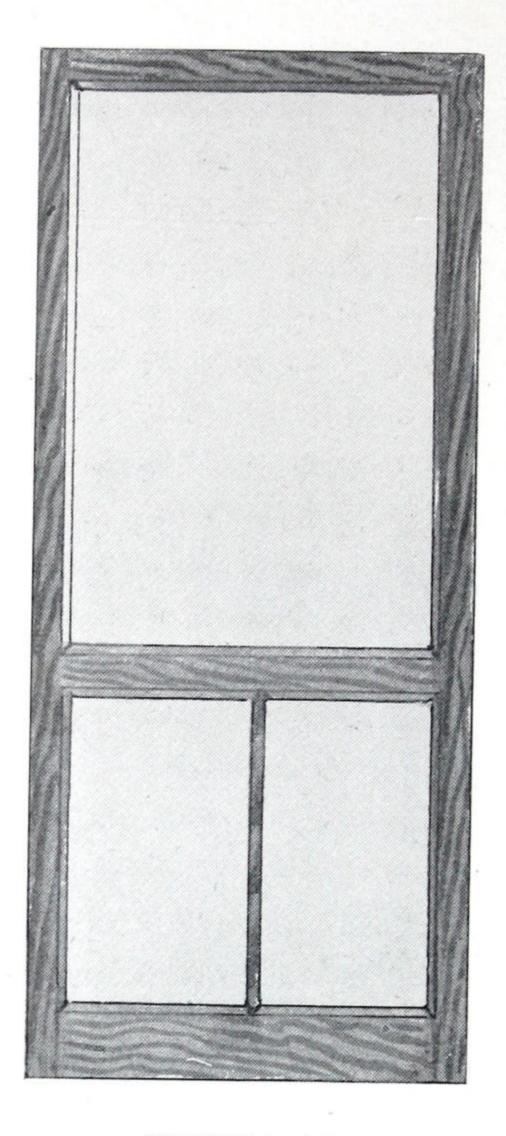

Keep in a dry place until you are ready to hang them, and after fitting give the top and bottom edges a coat or two of good paint.

Caution—Do not put in a freshly plastered room, or near a steam pipe, and don't hang until building is thoroughly dried out.

"	4' 0" to 3' 6"					1.45
	4' 6" to 4' 0"					
"	5' 0" to 4' 6"					1.65
For Seg	gment Head add to	list.				2.30
For Cir	rcle or Gothic Head	l add	to li	st		4.60

INSIDE BLINDS OR SHUTTERS

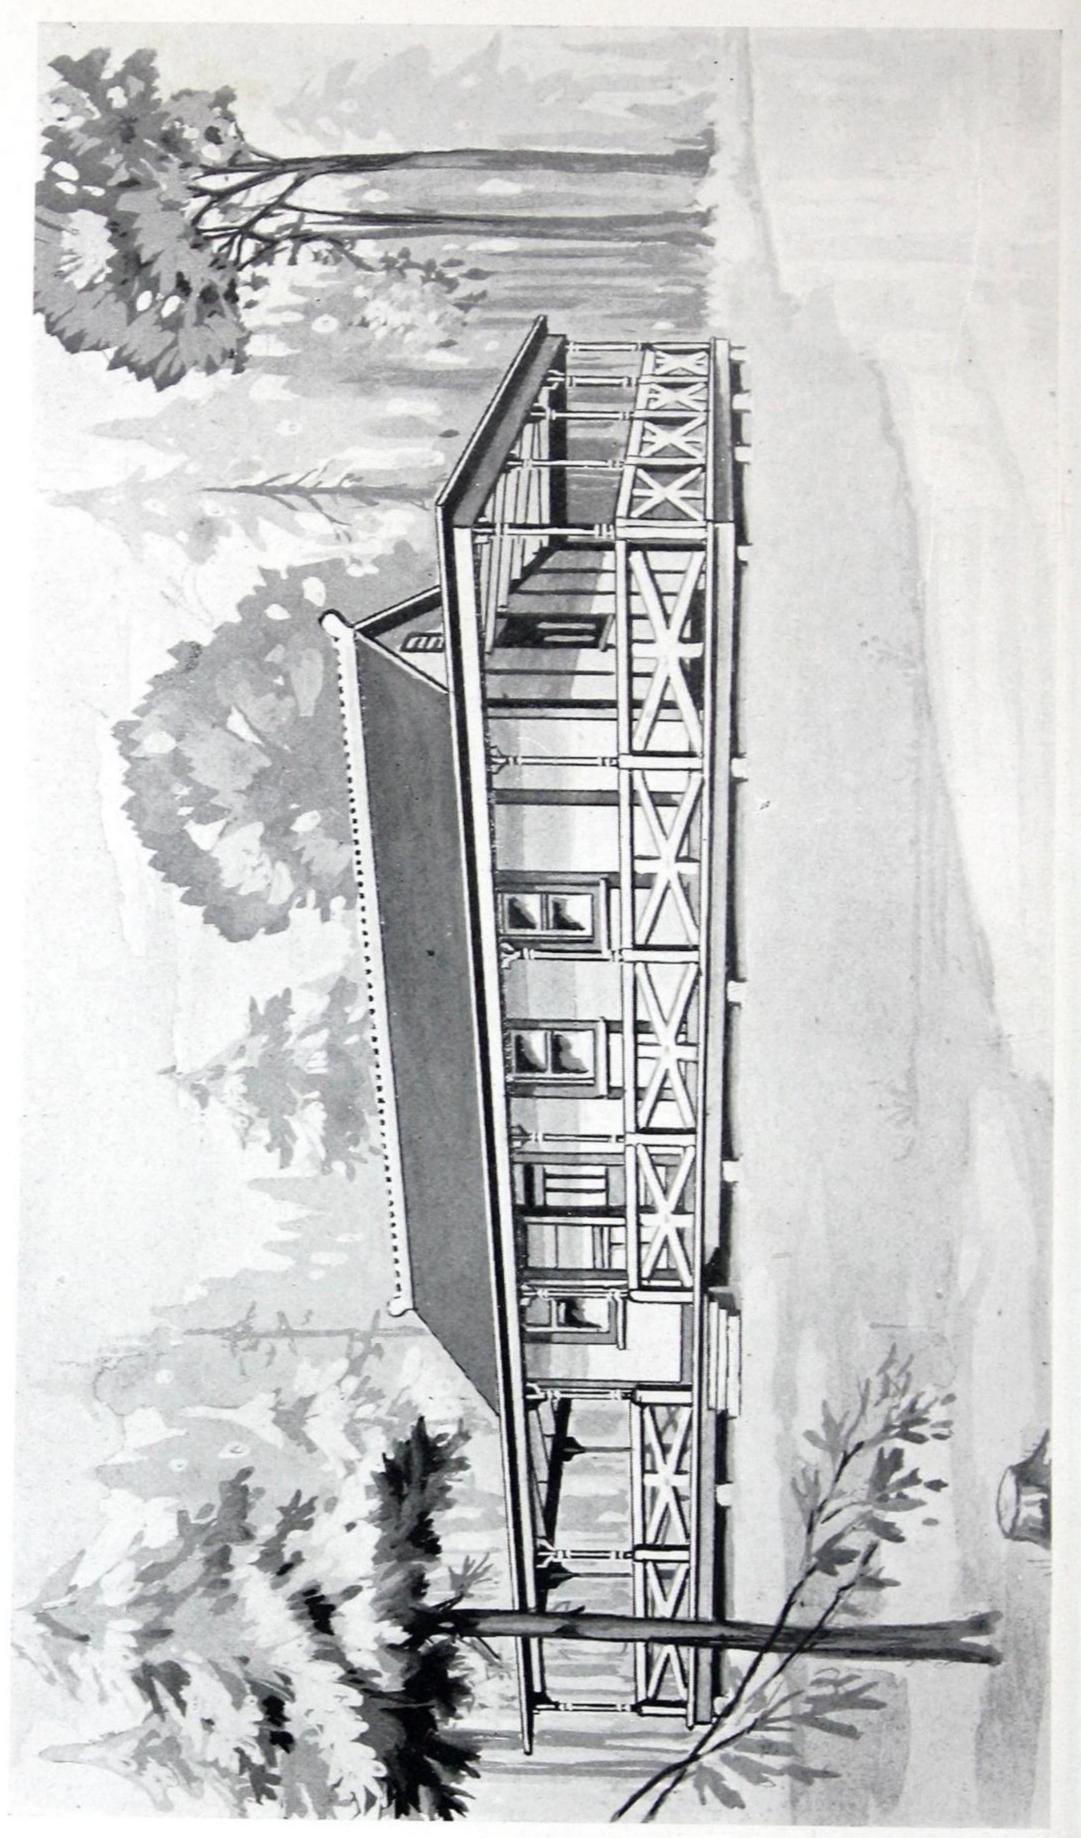

Prices are per lineal foor in height, 11/8" thick or less. Four folds. Pine.

Width	2' 6" and less \$2	2.80
"	3' 0" to 2' 6"	3.10
		3.40
		3.70
		1.00
"	5' 0" to 4' 6"	1.30

NOTE:—To determine the price of Two or Three Fold Blinds.

For Two Folds—Double the widths to convert it into four folds and then observe in which line it occurs. Then take one-half the price of that line for the price.

For Three Folds—Add one-third to width to convert it into four folds, and then observe in which line it occurs. Then take three-quarters the price of that line for the price.

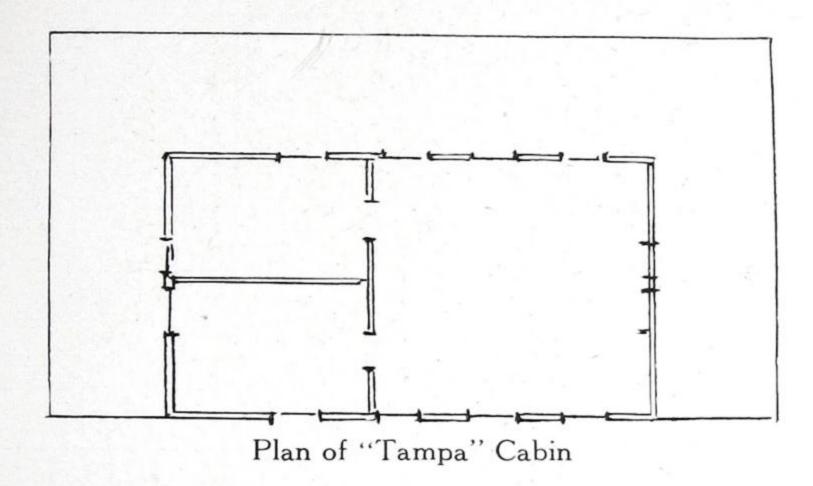

Portable Houses

No Nails or Tools required other than a Screw Driver and Wrench to Erect these Houses

THE DAVIDSON PORTABLE HOUSES, when put together, are strong and substantial and practically wind and storm proof. They are put up for shipment in crates or packages of a convenient size for handling and transporting.

Among the various uses that our houses are put to are CABINS FOR SPORTSMEN and SUMMER RESORT COTTAGES. These houses are made in sections that are duplicates of each other as to sizes, that is, the solid sections are the same size as those in which are placed the windows and doors, so that the purchaser has the opportunity of arranging the windows and doors in the house to suit himself, or can change the arrangement each time he takes down and puts up the house. The panels are 3' 2" in width and 6' 6" in height.

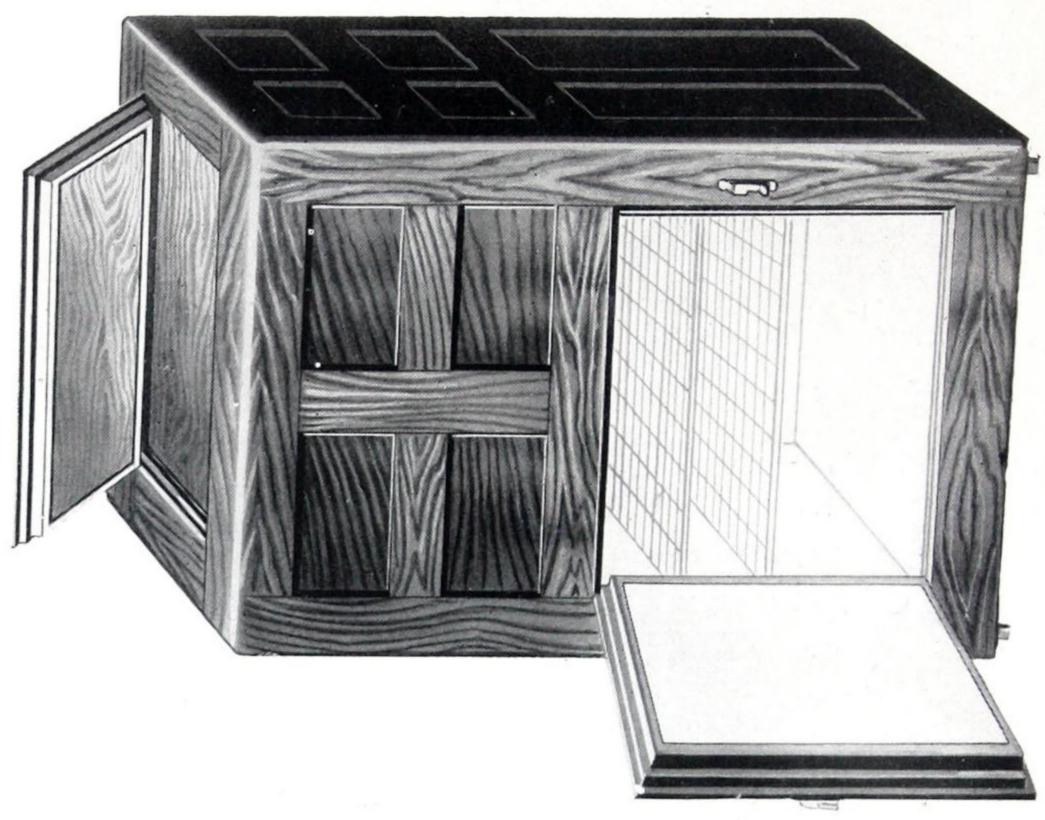

In our large house, or in fact any of them, partitions can be furnished to divide them into as many rooms as desired.

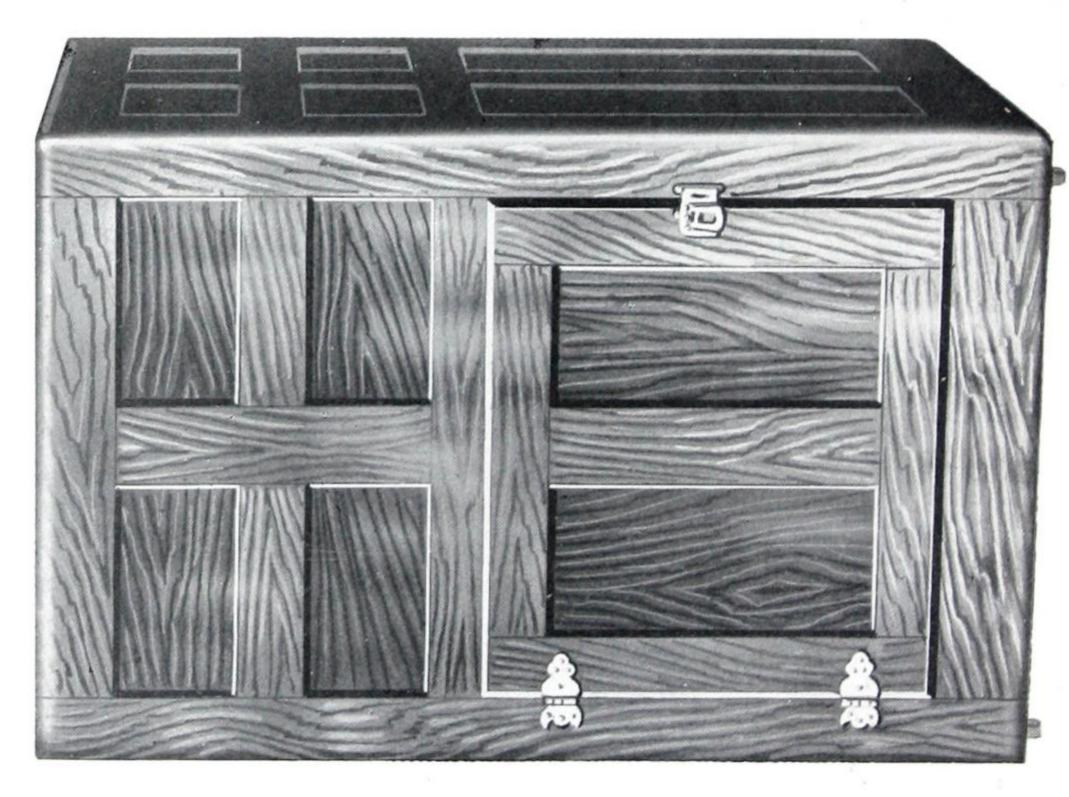

Catalogues and Prices furnished upon Application

HE NORTH STAR

North Star Refrigerator

THE NORTH STAR is rapidly taking the place of those less efficient now on the market.

OUR REFRIGERATORS are lined with odorless wood or porcelain enamel.

Zinc-Lined Refrigerators cause disease.

THAT STALE SMELL about a refrigerator is a danger signal. The zinc is corroding, and the oxide poisoning milk and food.

THE NORTH STAR REFRIGERATOR is dry, clean and hygienic: of superior construction, and unequalled for economy of ice.

Plain Facts Undisputed

THE NORTH STAR REFRIGERATOR has no rival as a preserver.

THE NORTH STAR has been thoroughly tested and found to have a superior circulation of pure, dry air.

THE NORTH STAR is constructed on a scientific principle. The dry air circulation is so thorough that a match can be lighted on the wall of the preserving chamber.

N.B.—Milk, Butter, Fish, Ham and Onions can be kept in the same chamber without tainting.

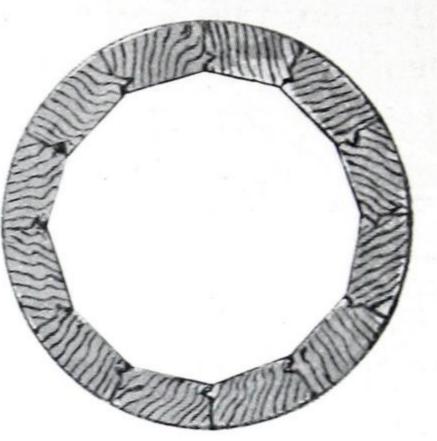

Butchers' and Grocers' Refrigerators Made to Order "Every Refrigerator is Guaranteed"

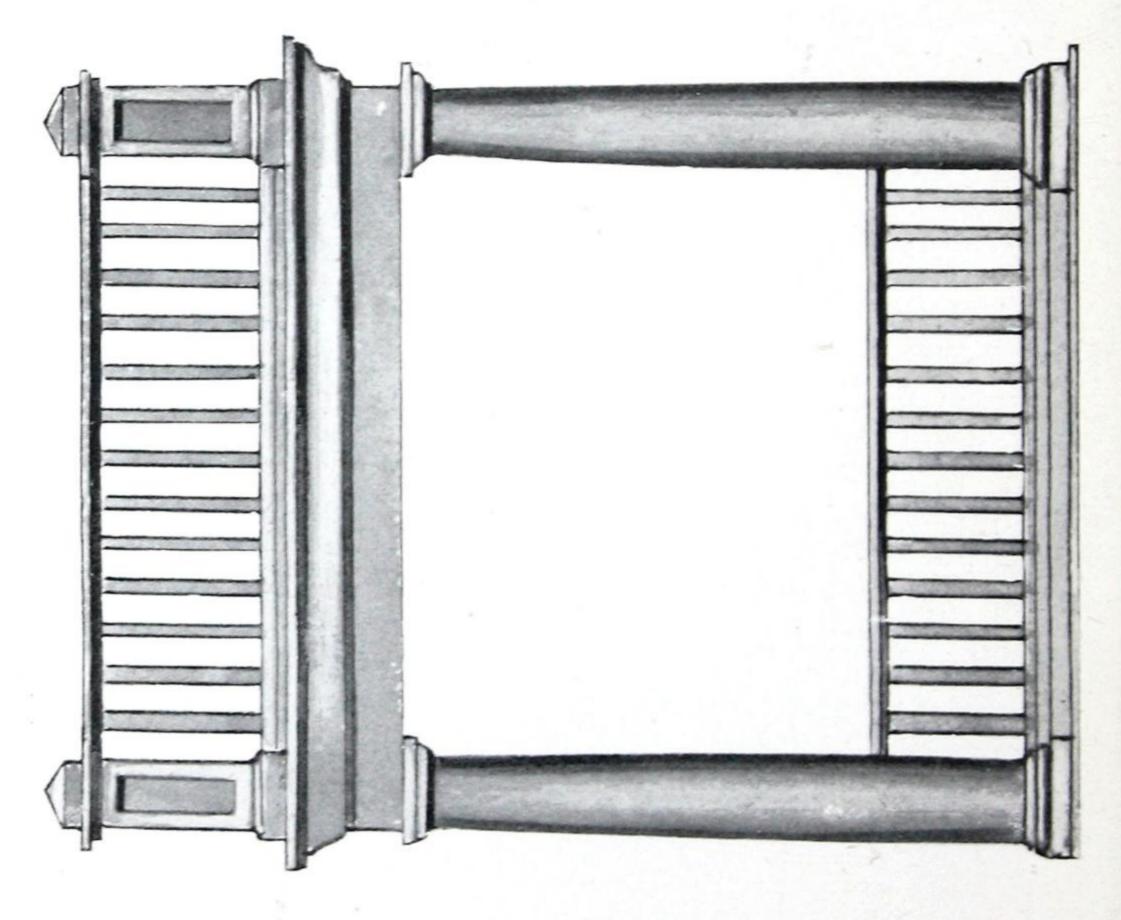

Catalogue and Prices furnished upon Application

Columns, Pedestals, Top and Bottom Rail, Balusters, etc. All kinds of Veranda Material, Including

Window & Door Frames

OUR facilities in this line are complete, and consequently we are in position to furnish them at lower prices than the ordinary carpenter can make them.

When asking for prices on Frames, state if for Wood or Brick, or Brick Veneer Building, giving width and thickness of each member finished size. Also state whether Frames are wanted nailed together or shipped in the knock-down, or send pencil sketch.

Millwork

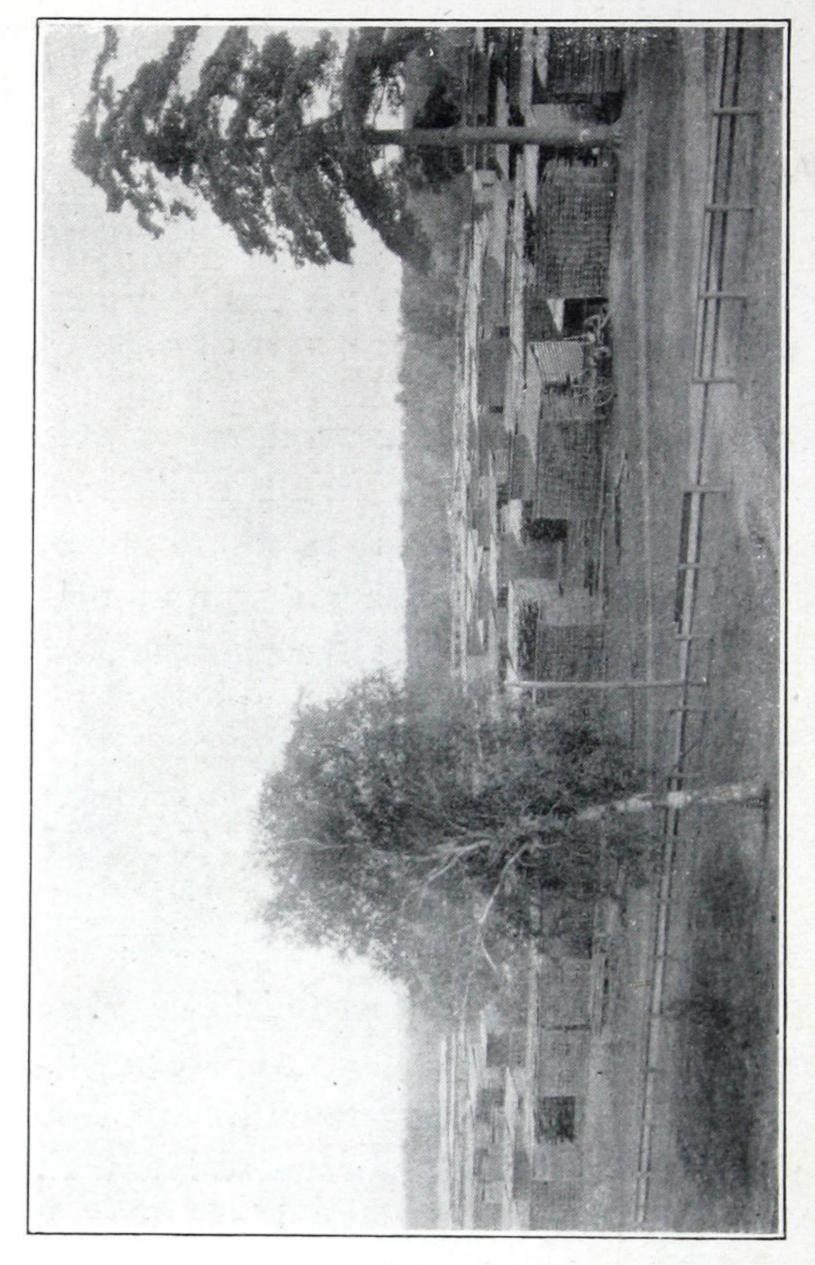

INTERIOR and Exterior finish of all kinds, Brackets, Scroll and Turned Work, Veranda Columns, Stair Work, Office and Bank Counters, Pulpits and Pew Ends, Door and Window Frames, North Star Refrigerators, Portable Houses, Mouldings, Box Shooks and Cases, etc.

Prices furnished on application

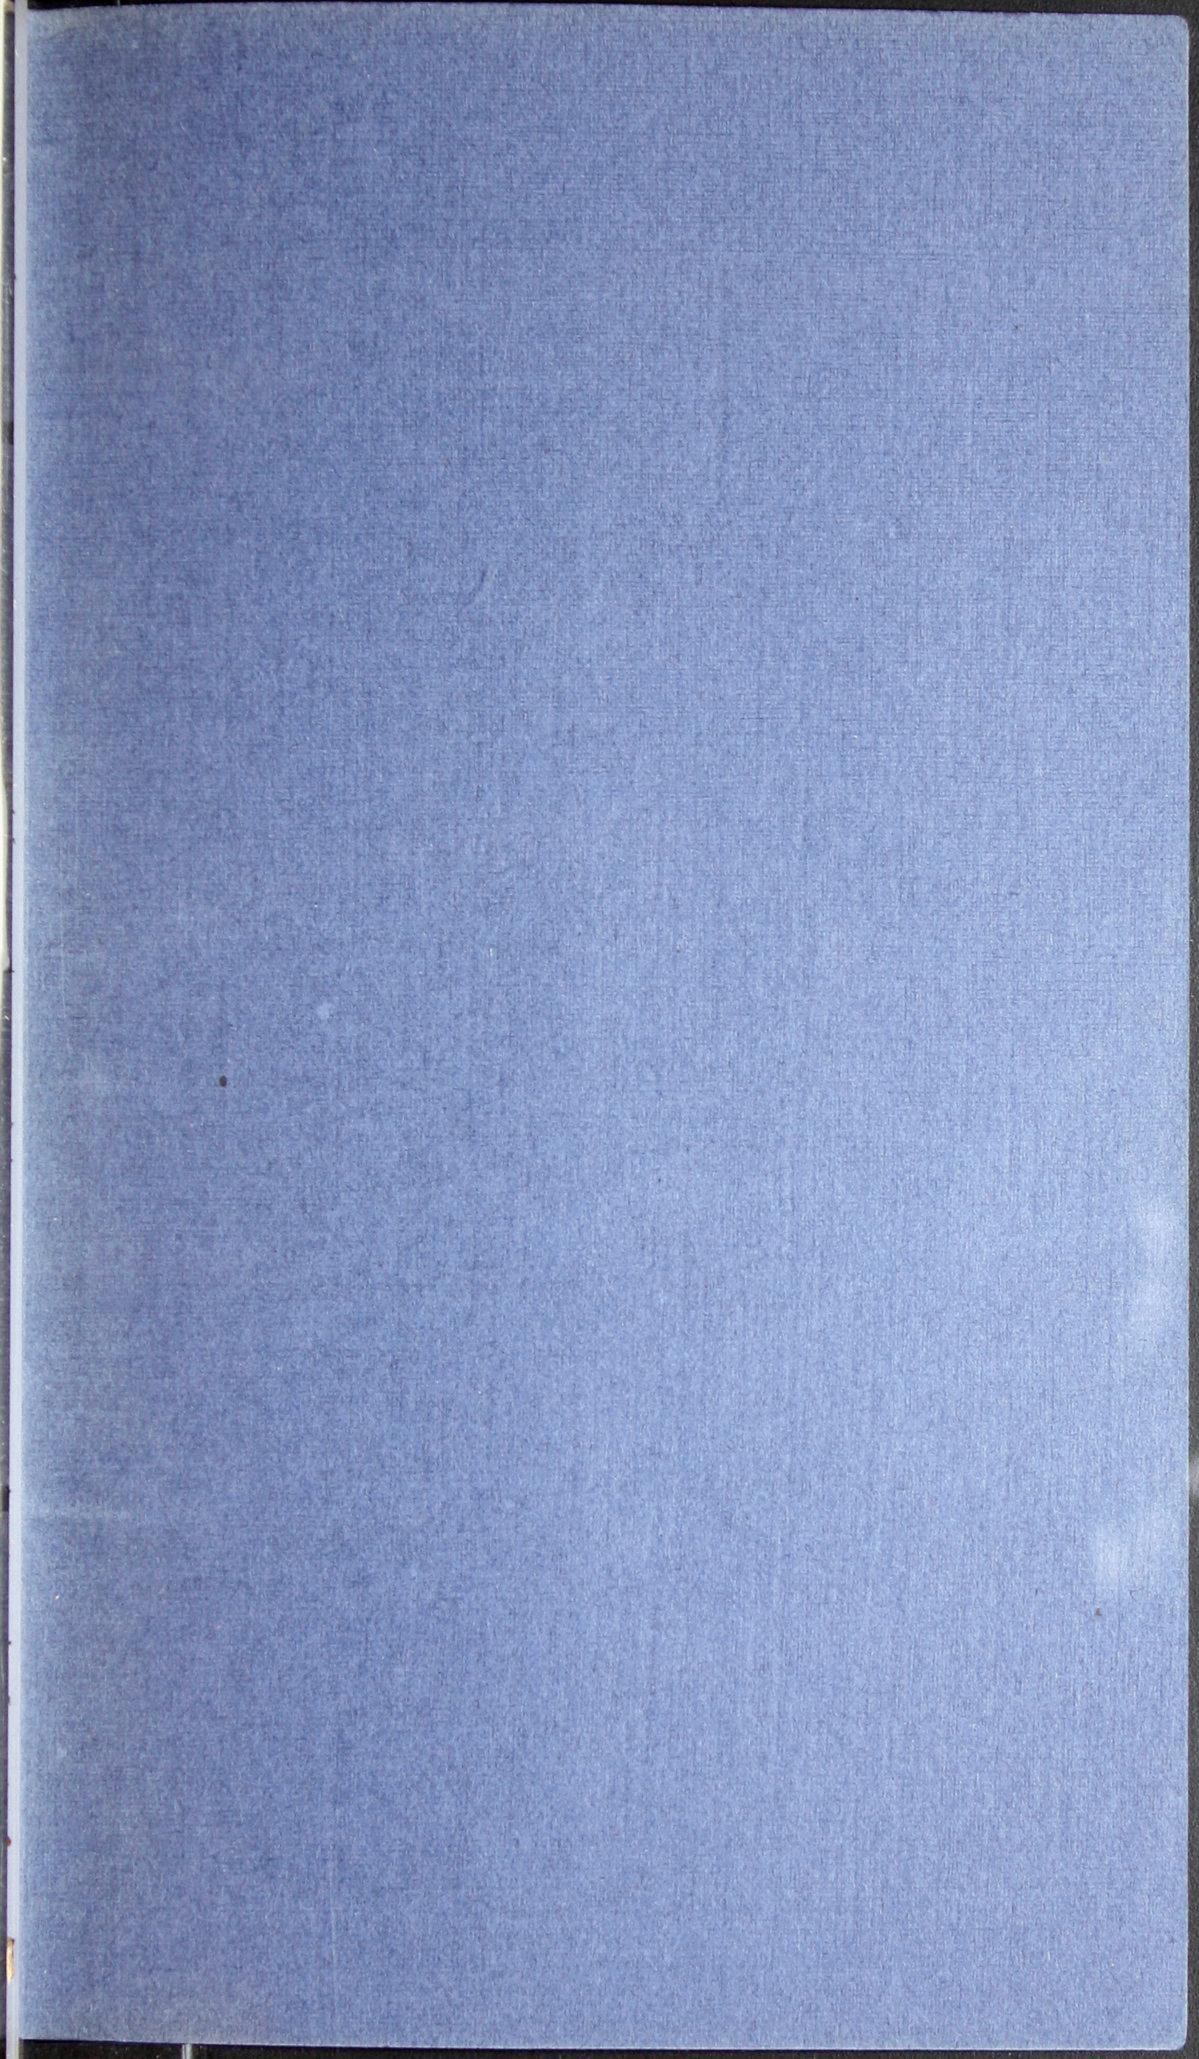

James Davidson's Sons' Lumber Yard, at Davidson, Quebec, where we have piled each season ten million feet of White Pine Lumber.
